Goals of FireSmart

FireSmart encourages home owners to improve their properties to reduce damages and minimize the hazards associated with wildfire. These practices aim to:

- Reduce the potential for an active crown fire.
- Reduce the potential for ember transport.
- Create landscape conditions around properties where fire suppression efforts can be effective and safe for responders.
- Treat fuel adjacent and nearby to structures to reduce the probability of ignition from radiant heat, direct flame contact and ember transport
- Upgrade structures and assets to reduce the probability of ignition and loss.

STEP 1

Book a free FireSmart assessment to learn what you can do to improve your home and property's wildfire resilience

Contact Marc Albert at
firesmartpr@gmail.com or 604-414-7839
to schedule an assessment

What does an assessment look like?
A qRD FireSmart representative tours your property with you, the property owner. Together we identify any vulnerabilities to wildfire and consider the mechanisms behind the fire risk. We then discuss potential improvements and you are provided with a summary of FireSmart recommendations for your property.

STEP 2

START FIRESMARTING YOUR HOME OR PROPERTY

- Review the *Recommended Activities* form
- Select one or more of the FireSmart recommendations to work on
- Remember to take "before" and "after" photos before you start
- Once you log 42 hours of volunteer time or spend \$1000 you are eligible for a full \$500 rebate
