Your Community Plan in Action!

Between 2017 and 2019, the Texada community was engaged in creating the Texada Island Official Community Plan (OCP). On August 26, 2021, *Texada Island Official Community Plan Bylaw No. 551, 2019* was adopted by the Regional Board.

Section 478 of the *Local Government Act* contains the basic consistency rule which states that after adoption of an official community plan, all bylaws enacted and works undertaken by a board must be consistent with the relevant plan.

▶ To meet the consistency rule, the existing *Texada Watershed Protection Bylaw No. 237, 1993* needs to be updated. These updates modernize the bylaw and ensure consistency with the *Texada Island Official Community Plan 551, 2019* and current provincial legislation.

Texada Island Community Watershed Zoning Bylaw

In addition to modernizing the 28 year old bylaw, the proposed new bylaw will:

- align the zoning districts and land use regulations with the land use designations and policies set out under the *Texada Island Official Community Plan Bylaw No. 551, 2019*;
- remove development permit restrictions;
- align the definitions and general provisions with current provincial legislation;
- provide clear language for improved bylaw interpretation;
- provide accurate maps for improved bylaw interpretation; and
- provide the ability to view the zoning boundaries on the qathet Regional District iMap online mapping.

 - (b) minimizing road construction; and
 - (c) minimizing unnecessary disturbance to natural drainage patterns;
3. The need to safeguard watercourses from contamination from sewage and other forms of household wastes;
4. The importance of minimizing and/or avoiding land use development in community watersheds which would generate wastes harmful to water quality; and
5. The need to maintain an adequate water recharge area in order to sustain a sufficient quantity of water for community water supply systems;

NOW, THEREFORE, the Board of Directors of the qathet Regional District, in open meeting assembled, enacts as follows:
