

**Submitted date:** 2023-07-31 15:51:05 Pacific Daylight Time

# LGCAP Year 2 Survey

## Introduction

Reaching [net-zero emissions](#) and adapting to a changing climate will require a whole-of-society approach. The new Local Government Climate Action Program (the Program or LGCAP) aims to catalyze the efficient flow of financial resources, data and knowledge between Modern Treaty Nations, local governments, and the Provincial Government to allow for cost effective, impactful, locally implemented climate action. For more information about the Program you can refer to the [website](#) and [Program Guide](#).

## **What is climate action?**

For the purposes of this program, a climate initiative or action is one that reduces greenhouse gas (GHG) emissions and/or strengthens resilience to the impacts of climate change (adaptation). This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

## **Information collected will:**

- Highlight local government and Indigenous climate leadership;
- Profile action by including local government and Modern Treaty Nation emissions, resilience and climate action performance data in the annual [Climate Change Accountability Report](#);
- Help inform policy development and monitor progress on achieving provincial and local climate objectives; and
- Support provincial efforts to better collaborate with and support communities to advance climate action.

## **The survey was informed by:**

- Feedback from local governments, Modern Treaty Nations and ministerial partners;
- National and international GHG reporting protocols; and
- The [CDP](#) (global disclosure system).

## Instructions

*\*Please do not provide any personal information (e.g. email, phone number) in the survey.*

## **Survey: Word Version**

A survey template (i.e. a Word version) is available on the [Local Government Climate Action Program webpage](#). The template can be used to gather information from staff across departments. Then simply cut and paste into the online version where you'll be submitting the survey.

## **Survey: Online Version**

SimpleSurvey allows multiple users to access your survey, though two people **cannot** enter information at the same time.

- For other users to contribute to your survey, simply share the unique link with your team members.
- Users must select "Save and continue later" when they are done updating the survey but not ready to submit.

Required fields are indicated with a red asterisk (\*). You will not be able to submit the survey and attestation form without completing these fields.

- Some fields have formatting considerations (i.e. numbers only). You will not be able to submit the survey and attestation form until all required fields are completed properly. The red text error message will indicate what is needed.

## **Attestation Form**

The attestation form is filled in after survey questions are completed. It is the second page of the SimpleSurvey submission.

- The attestation form is where the Chief Financial Officer, or equivalent position, attest to the following:
  - That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
  - That Local Government Climate Action Program funds held in reserve will be spent by March 31, 2025.
  - That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2023.

## **Requirements**

### **1. Reporting**

1. Report on **at least one** project linked to objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#). If your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. Funding for the project(s) does **not** need to come from this program.
  2. Attest that funds will be allocated to climate initiatives before submitting your survey.
  3. For communities with populations of 15,000+, measuring and reporting local government or Nation's corporate emissions is required.
- Optional open-ended questions asking for one or more initiatives related to climate action may be highlighted in the LGCAP Year 2 Summary Report or other Program materials to acknowledge innovative local climate solutions.

### **2. Deadline to submit the survey & attestation form**

- The deadline for submitting your survey and attestation form is 4 PM PDT on July 31, 2023.

### **3. Posting the survey & attestation form publicly**

- The design / format of the form **can** be changed however all information from required questions must be included.
- Optional questions and answers can be omitted.
- The deadline to post the survey and attestation form publicly is September 30, 2023.

## **Download a copy for your records!**

Once submitted, you can **download a copy of the completed survey** and attestation form (PDF, Excel, and Word options). If you close this window before the download link appears, please reach out for a copy of your submission.

## **Support**

If the survey is accidentally submitted, a submitted survey needs to be revised, or if you have any questions, please reach out to us at [LGCAP@gov.bc.ca](mailto:LGCAP@gov.bc.ca). We will be happy to provide assistance.

Thank you!  
The LGCAP Team

# The Survey

## Climate Action Planning

Climate Action Plans are strategic roadmaps that identify how an organization will reduce their greenhouse gas (GHG) emissions (mitigation), increase their resilience to the impacts of climate change (adaptation), or a combination of both.

To answer the following questions, consider staff that contribute to activities that reduce greenhouse gas (GHG) emissions and/or strengthen resilience and the ability to adapt to climate-induced impacts. This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

### Question 1: How many staff in full time equivalents (FTEs) are dedicated to working on climate action?

For example: Can include staff in engineering, emergency management, sustainability, transportation, waste management, etc. If a staff member is a climate action coordinator and works 100% on climate-related issues, add 1.0. If a staff member works approximately 25% (please estimate) on climate-related issues, add 0.25. Working on climate-related issues does not need to be written into the staff member's job description to be counted here.

0.10

### Question 2: Does your local government or Nation have a climate action plan or other guiding document(s)?

No

If not, please select one or more options from the list.

No, we are not intending to undertake one due to lack of financial capacity.

No, we are not intending to undertake one due to lack of expertise or technical capacity.

Question 3: Has your local government or Nation declared a climate emergency?

No

Question 4: Please select the top 3 challenges impeding the advancement of climate action in your community.

Lack of staff capacity or expertise.

Lack of financial resources.

Lack of data or information.

## Corporate Greenhouse Gas Emissions

Measuring corporate emissions is a Program requirement for all communities with a 2020 population of 15,000 and above ([see population statistics here](#)). Corporate GHG emissions are those produced by the delivery of local government or Modern Treaty Nation “traditional services” including:

- Fire protection,
- Solid waste management,
- Recreational / cultural services,
- Road and traffic operations,
- Water and wastewater management, and
- Local government administration.

Please see the following resources for guidance:

- [Scope Summary Document](#),
- [Corporate Inventory Reporting Tool](#),
- [Becoming Carbon Neutral Guidebook](#) (Scope),
- [Carbon Neutral Workbook](#) (Scope),
- [Contracted Services Emissions Guidance](#),
- [Contracted Emissions Calculator](#),
- [2022 BC Best Practices Methodology for Quantifying GHG Emissions](#), and
- [Emission Factors Catalogue](#).

Question 5: For the 2022 calendar year, has your local government or Nation measured and reported associated corporate GHG emissions?

Yes

If your local government or Nation measured 2022 corporate GHG emissions, please report the number of corporate GHG emissions from services delivered directly by your local government (in tonnes of carbon dioxide equivalent).

89.97

If your local government or Nation measured 2022 corporate GHG emissions, please report the number of corporate GHG emissions from contracted services (in tonnes of carbon dioxide equivalent).

132.03

If your local government or Nation measured 2022 corporate GHG emissions, please report the total number of corporate GHG emissions from both directly delivered and contracted services (in tonnes of carbon dioxide equivalent).

This would be the sum of the two questions above.

222.00

Optional: Please indicate how many tonnes of CO<sub>2</sub>e are associated with facilities.

33.27

Optional: Please indicate how many tonnes of CO<sub>2</sub>e are associated with mobile sources.

56.70

Please provide the link to the public report if available.

Optional

<https://www.qathet.ca/about/forms-documents/reports-studies>

Optional: Please provide any further comments you wish to share on corporate emissions measurement and reporting here (e.g. system or approach used to measure corporate emissions).

*In 2022, we improved our reporting process, capturing more GHG sources. As a result, reported GHG quantities increased, mainly due to the better measurement, not increased emissions.*

## Community-Wide Greenhouse Gas Emissions

B.C. Climate Action Charter signatories have committed to measuring and reporting their community-wide GHG emissions generated from all GHG sources (anthropogenic) within their community boundary.

The Community Energy and Emissions Inventory (CEEI) initiative provides a provincial framework for tracking and reporting energy and GHG emissions at a community-wide scale. It is published with a two-year lag, however, raw data can be requested by local governments that wish to measure and report their community-wide emissions for the buildings and solid waste sectors ahead of publication.

The Climate Action Secretariat (CAS) is aware that some local governments are developing their own community-wide GHG emissions inventories (separate from the provincial CEEI). A better understanding of community-wide emissions measurement across B.C. will help CAS as we upgrade CEEI.

Question 6: For the 2022 calendar year, have community-wide GHG emissions been measured for your local government or Nation?

No

If not, please select all that apply from the list.

No, we do not measure and report community-wide emissions data due to lack of financial capacity.

No, we do not measure and report community-wide emissions data due to lack of staff and technical capacity.

If not, has your community or Nation measured and reported community-wide emissions in the past?

No

Question 7: Currently, the Province's legislated GHG emission reduction targets are 40% by 2030, 60% by 2040 and 80% by 2050, relative to 2007. Please state your local government or Nation's target(s).

2030

Reduction (format: e.g., 40%)

0

Baseline Year (format: 2007)

0

2040

Reduction (format: e.g., 40%)

0

Baseline Year (format: 2007)

0

2050

Reduction (format: e.g., 40%)

0

Baseline Year (format: 2007)

0

If your local government or Nation's targets don't conform to the target years noted above, please enter them here. Format e.g.: target 2035 50% baseline 2010, target 2060 70% baseline 2010, ...

*Targets are set for individual electoral areas and included in each area's Official Community Plan. The most recent targets are: Area A OCP – target 25% reduction in 2050 compared to 2010 baseline, Area B OCP – target 10% reduction in 2021 compared to 2010 baseline, Area C OCP - target 10% reduction in 2021 compared to 2010 baseline, Savary Island OCP – target 33% reduction in 2021 compared to 2010 baseline.*

Question 8: The Province has also committed to introducing a target of net-zero emissions by 2050. Does your local government or Nation have a net-zero or carbon-neutral emissions target?

Yes: Carbon neutral (Carbon neutral refers to a jurisdiction achieving a state of no net carbon dioxide emissions being released into the atmosphere (e.g. Reducing emissions as far as practical and purchasing offsets or other similar mechanisms))

Question 9: If data was provided by the Province, which three supporting indicators would be most valuable to your local government or Nation to advance climate action?

Commute by mode: Employed labour force by mode of commute

Walk score: Proximity to services

Proximity to transit: Persons, dwelling units and employment within walking distance of a "quality" transit stop/line

Optional: Please provide any further comments you wish to share on community-wide emissions measurement and reporting here.

*Transportation is the main source of GHG emissions in our region. As a local government/Nation, we are dedicated to addressing these emissions to support our commitment to sustainability. However, in rural areas with low population density and limited financial resources, reducing emissions can be challenging. We are actively exploring solutions tailored to our community's needs and resources to make progress in our climate action efforts.*

## Provincial Policy Alignment - Mitigation

The CleanBC Roadmap to 2030 is B.C's plan to meet provincial emissions reduction targets to be 40% below 2007 levels for 2030 and set on course to reach net-zero emissions by 2050.

One requirement of this Program is that you must **report on a minimum of one project** linked to objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#) (CPAS). Funding does **not** need to come from this program. For questions 10-12, if your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. That said, please select all that apply.

Question 10: Please indicate all climate initiatives your local government or Nation had in-progress or completed in the 2022 calendar year related to the buildings sector.

The buildings and communities sectoral target for the province is 59% to 64% emissions reductions by 2030.

Topping up Provincial energy efficiency programs

Efficiency upgrades to public buildings

**Optional: Please highlight a community project(s) that was in-progress or completed in the 2022 calendar year related to buildings.**

*In 2022, our Community Wood Smoke Reduction Program (CWSRP) was an ongoing initiative aimed at reducing wood smoke exposure in BC communities and enhancing air quality. The main focus of this program was to replace old, smoky, and inefficient wood stoves with cleaner heating options, including heat pumps, pellet stoves, electric inserts, and cleaner-burning wood stoves. The qRD received a grant to continue the Community Wood Smoke Reduction Program in 2022. The program offered rebates to residents, helping to alleviate financial barriers associated with replacing old wood stoves. These rebates could be used to top-up various other rebate programs related to energy efficient heating appliances. Additionally, the initiative provided valuable education on best practices for efficiently operating wood-burning appliances. Throughout 2022, this program led to the successful replacement of 17 old wood stoves with cleaner heating alternatives.*

**Question 11: Please indicate all climate initiatives your local government or Nation had in-progress or completed in the 2022 calendar year related to the transportation sector.**

The transportation sectoral target for the province is 27% to 32% emissions reductions by 2030.

Improving or expanding public transportation

Active transportation planning

Electric vehicle charging studies/planning

**Optional: Please highlight a community project(s) that was in-progress or completed in the 2022 calendar year related to transportation.**

*Project 1: In 2022, the (qRD) partnered with BC Transit to increase public transit service and expand rural transit routes. Improving transit services in our area makes transit more convenient and accessible for residents and translate to a reduction in the number of cars on the road which will contribute to a decrease in greenhouse gas emissions. Project 2: The qRD initiated an on-demand transit study to explore innovative ways of meeting our community's transportation needs efficiently. This project is continuing into 2023. Project 3: The qRD started collaborating with the Sunshine Coast Tourism and the Sunshine Coast Regional District on the preliminary design of an All Ages and Abilities Active Transportation Route from Sechelt, BC to Lund, BC. This project aims to create a safe and user-friendly route that encourages walking, cycling, and other active forms of transportation between these locations.*

**Question 12: Please indicate all climate initiatives your local government or Nation had in-progress or completed in the 2022 calendar year related to community-wide action.**

Complete, compact communities

Organics diversion

Circular economy or zero waste strategy

Other

*Ocean Legacy - ocean plastics cleanup*

**Complete, Compact Communities - Please select all that apply.**

See Complete Communities Guide and Program for supports advancing identified community goals through the creation of more complete, compact and energy efficient communities.

Rezoning

Secondary suites and laneway homes

Infill development

**Optional:** Please highlight a community project(s) that was in-progress or completed in the 2022 calendar year related to community-wide action.

*For Complete Compact Communities: In 2022, the qRD worked to develop OCP amending bylaws to provide a consistent policy framework that supports secondary suites and accessory dwelling units where servicing is available. For Circular Economy: The qRD has secured a \$1 million grant for diversion infrastructure. This funding will facilitate the proper management and recycling of materials, including an ocean plastics depot where ocean plastics are diverted for recycling into 100% recycled products. This project continues in 2023. For Organics: In 2022, the qRD continued its organics diversion program and is in the process of developing an organics collection program and organics processing facility within the region to process food waste, soiled paper and yard and garden materials. During 2022, approximately 790 tonnes of organic material was diverted from landfill and eliminated the by-products of landfilling organic materials.*

## Provincial Policy Alignment - Resilience and Adaptation

The goal of climate adaptation is to reduce risk and vulnerability associated with climate change impacts. To manage climate impacts, local governments and Nations are integrating adaptation principles into decisions and everyday activities. One requirement of this program is to report on projects linked to one or more objectives from the CleanBC Roadmap and/or the CPAS.

One requirement of this Program is that you must report on **at least one or more** project(s) linked to one or more objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#) (CPAS) in Questions 10-13. If your community reports one initiative related to one sector you have satisfied this requirement, but please select all that apply for Questions 10-13.

**Question 13:** Please indicate all initiatives your local government or Nation completed or had in-progress in the 2022 calendar year to adapt to and build resilience to climate impacts.

Addressing current and future climate risks through plans, adaptation measure implementation, programs, service delivery, asset management and/or other functions.

**Optional:** Please highlight one or more climate adaptation project(s) that were completed or in-progress in the 2022 calendar year to reduce risk and increase resilience.

*In 2022, the qRD completed a Regional Coastal Flood Adaptation Strategy in collaboration with the City of Powell River and Tla'amin Nation. The strategy will guide and inform future land use, asset management, emergency preparedness, and community engagement initiatives. Using the insights gained from developing the strategy, we aim to proactively reduce the risks associated with coastal flooding and erosion and increase the resiliency of our region's coastal areas, ensuring that our communities are better prepared to face the challenges posed by coastal hazards.*

**Question 14:** Has a climate risk and vulnerability or similar assessment been undertaken for your local government or Nation?

No

If not, please select one or more options from the list.

No, we are not intending to undertake due to lack of financial capacity.

No, we are not intending to undertake due to lack of staff and technical capacity.

**Question 15: What are the most significant climate hazards faced by your jurisdiction and what is the timeframe of their expected impact to your community?**

For each selection, please then indicate if the timeframe of their expected impact is short, medium, long or not sure. (short [current/by 2025]; medium [2026-2050]; long [beyond 2050])

Extreme heat and heat stress

*short*

Water shortages

*short*

Wildfire

*short*

Coastal flooding, storm surge events and/or other coastal hazards

*short, medium and long term*

Wind, rain, and other storm events

*short*

**Question 16: What information do you need to know to be able to plan effectively for the future of your community, with respect to the impacts identified in Question 15? Please select one or more of what you consider the most valuable types of information for planning.**

Assessment of potential community impacts

**Question 17: Based on the hazards you indicated as most significant in Question 15, which groups are most vulnerable to the impacts of climate hazards?**

Low-income households

Indigenous Peoples

Seniors

Persons with disabilities

Other

*Any and all people and property within an identified hazard risk area*

**Question 18: Of the hazards identified in Question 15, please specify the associated adaptation measures completed or in-progress in the 2022 calendar year, if any.**

If entering a hazard under "Other", please also write the hazard in the "Adaption measure" textbox.

Wildfire

Adaptation measure

*Implementing recommendations from Community Wildfire Plan, including Fire Smart community education*

Coastal flooding, storm surge events and/or other coastal hazards

Adaptation measure

*Implementing recommendations from the qRD's Coastal Flood Adaptation Strategy*

Wind, rain, and other storm events

Adaptation measure

*Implementing recommendations from the qRD's Drainage Study*

## Equity

Taking an equity-informed approach to climate action is about enhancing climate resilience for

everyone in B.C., regardless of where and how they live and requires a just approach that integrates equity considerations into climate planning and adaptation responses.

**Question 19: How does your community ensure equitable access to and distribution of climate action opportunities and benefits?**

Please select all that apply.

By engaging with equity seeking groups/frontline communities most impacted by climate policy and change.

**Optional: Please highlight a climate initiative completed or in-progress in the 2022 calendar year that promotes equity and inclusion.**

*In 2022, the qRD completed a Regional Coastal Flood Adaptation Strategy in collaboration with the City of Powell River and Tla'amin Nation. The strategy will guide and inform future land use, asset management, emergency preparedness, and community engagement initiatives. Using the insights gained from developing the strategy, we aim to proactively reduce the risks associated with coastal flooding and erosion and increase the resiliency of our region's coastal areas, ensuring that our communities are better prepared to face the challenges posed by coastal hazards.*

## LGCAP Year 1 Funding

The Program must be able to demonstrate the impact this funding has on greenhouse gas emissions reductions and resilience and adaptation in B.C. To substantiate the Program, we must develop a baseline understanding of where local governments and Nations are at with respect to climate action and track progress over time.

Please do your best to specify how much of your LGCAP funds was invested for each initiative undertaken without double counting.

**Question 20: What did/will your local government or Nation spend its LGCAP funding on for year one of the Program (2022)? Please select all that apply and indicate the total dollar value associated with each initiative.**

Textbox format: no dollar sign and up to two decimal points (i.e. 2500 or 657.25). If selecting "Other", please write both the item and the amount of funding in the textbox.

Put in reserve for future project  
72082.00

### Reserve funding - How will funds be allocated?

No decision has been made.

**Question 21: How much additional funding for climate action were you able to invest by leveraging your LGCAP funds? This could include matching grants as well as private investment.**

Format: no dollar sign and up to two decimal places

0

Question 22: Please estimate the total investment in climate mitigation your local government or Nation made in 2022, including from sources beyond your LGCAP funds. For guidance, this includes (but is not limited to): integrating climate change mitigation (i.e. GHG reduction) measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, and increasing human and institutional capacity with respect to climate change mitigation.

Format: no dollar sign and up to two decimals If no estimate is possible, please provide 0 as an answer.

265170.10

Question 24: Please estimate the total investment in climate adaptation and resilience your local government or Nation made in 2022, including from sources beyond your LGCAP funds. For guidance, this includes all actions that strengthen resilience and the ability to adapt to climate-induced impacts. Examples include (but are not limited to): addressing climate-related hazards; integrating adaptation measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate adaptation, and impact reduction and early warning systems.

Format: no dollar sign and two decimal places If no estimate is possible, please provide 0 as an answer.

130350.00

Question 25: Does your community or Nation use a formal framework to apply a climate lens on infrastructure planning and decision-making?

This could include the Provincial preliminary GHG assessment guidance, the Federal climate lens guidance, or another climate lens framework.

No

Question 26: What is the value in the Program's continuity for your community?

Optional Note on posting the survey publicly: - Optional questions and responses such as this one can be omitted. - The Province will use the information for internal purposes only. - When posting the survey publicly, the design / format of the form can be changed. - All information from required questions must be included.

*The Program's continuity brings approximately \$72,000 of non-tax revenue to our community each year. This provides a financial incentive to undertake climate-based projects, encouraging sustainability and environmental initiatives.*

## Local Government Climate Action Program Attestation Form

Instructions for the Attestor (CFO or equivalent staff person):

Complete and sign this form by filling in the fields below.

I, the Chief Financial Officer, or equivalent position, attest to the following:

1. That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
2. That Local Government Climate Action Program funds held in reserve will be spent by March 31, 2025.
3. That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2023.

Attested by (first name, last name)

*Linda Greenan*
