EST: EST result indicates high colony density on membrane preventing accurate coliform counting.

BWA: Boil Water Advisory

OG: Overgrown - confluent bacterial growth on membrane preventing accurate coliform determination

 More than 200 background colonies noted on total coliform membrane filter per 100 ml. Indicates system requires flushing

Indicates high colony density on membrane preventing accurate coliform counting

* Total Coliform per 100 mL

** E. Coli per 100 mL

^{*}Note: For the purpose of the Drinking Water Protection Act and Regulation, Dr. Moliehi Khaketla is both a Medical Health Officer and a Drinking Water Officer.

DWO; Drinking Water Officer MHO; Medical Health Officer

Vancouver Coastal Health

Powell River Health Unit 3rd Floor - 5000 Joyce Ave Powell River, BC V8A 5R3 604 485 3310

Location of Water Source(s)

Directions to Site: Well is located 100 m NW of airport building in a cedar-sided shed at the edge of the apron

Attach photo's (Optional)

GPS settings: (if Known) 49 41.65' 124 31.07'

IN CASE OF EMERGENCY: Enter name of the person responsible for tasks.

If the water in the water system becomes contaminated or you receive an unsatisfactory water result, or in the event of an interruption in the treatment process:

- 1. Shut off water supply, if appropriate.
- 2. Regan Keil_will notify DWO or back-up health contact.
- 3. Contact other appropriate person(s) from the list of emergency numbers.
- 4. Larry Newman will notify any affected water users. Please keep a phone and address list of users and warning signs handy. May need to phone or hand deliver the notice (and water disinfection procedures) to the users.
- 5. Larry Newman will post warning signs.
- 6. Regan Keil will coordinate repair.
- 7. Organize alternate source of safe drinking water (if available).

Start-up Procedure

- 1. Identify and correct source of contamination.
- 2. Entire system should be flushed and disinfected. Follow attached guideline.
- 3. Submit water sample(s) to appropriate approved Lab for testing. For bacteriological contamination three negative successive samples are usually required. Contact your DWO to confirm the number of samples necessary.
- 4. Contact DWO for approval to resume use of water supply.

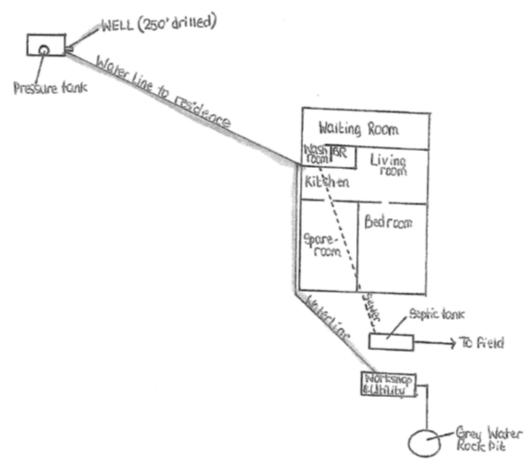

Posting the Emergency Response Plan

The ERP must be posted in a conspicuous location that is easily accessible to the operator and management of the water supply.

Location of ERP: Hanging in airport office.

Additional Information

- 1. Include a schematic drawing of the water supply system; from the source to the tap. Include all sources, storage, reservoirs, and treatment and distribution system.
- 2. Include public notices which may be required in the event of a "boil advisory" or "do not consume" notice. Templates are attached.

TEXADA AIRPORT WATER SYSTEM OUTLINE

DRAWING BY: RON CAVIN JULY 2006 Edited By: SARAH DOWDING JULY 2006

DO NOT USE WATER NOTICE

Texada Airport (qathet Regional District)

IS ADVISING ALL USERS
THAT THE DOMESTIC
WATER SUPPLY IS NOT
SAFE FOR DRINKING OR
DOMESTIC USE.

**DUE TO THE NATURE OF THE CONTAMINATION, BOILING MAY NOT

BOIL WATER ADVISORY

Texada Airport (qathet Regional District)

Water System

is advising all users to boil their water before using it for drinking, cooking, washing food, or brushing teeth, due to a potential problem with the water system.

The water can be made safe by boiling it for one minute at a rolling boil. Boiled water should be stored in a clean container in the refrigerator.

Alternatively, bottled water can be used.

You will be notified when service is returned to normal and the water is again safe to drink. Thank you for your co-operation in this matter.
